

How to Measure Your Kitchen

- Step 1** Draw a rough sketch of your kitchen.
- Step 2** Measure every wall, beginning at the left corner, to the far right corner. Write the total measurements in inches.
- Step 3** Measure from left corner to edge of opening, window or door.
- Step 4** Measure across opening from trim edge to trim edge.
- Step 5** Measure from trim edge to far wall. Compare steps 3, 4, and 5 to step 2. Both totals should agree.
- Step 6** Mark exact location of sink, water lines, drain, gas lines, electrical outlets, and switches on the drawing. (Measure to the center of these, not the edge.)

Windows and Doors

- Step 7** Measure from floor to window sill.
- Step 8** Measure from window sill to top of window.
- Step 9** Measure from top of window to ceiling.
- Step 10** Measure from floor to ceiling. Total of steps 7, 8, and 9 should equal this measurement.
- Step 11** Measure width of door from trim edge. Indicate position of door swing.
- Step 12** Measure remaining three walls; follow steps 2 through 11.
- Step 13** Measure stove, refrigerator, microwave, dishwasher, and sink, and list on drawing.
- Step 14** Double-check all your measurements.

Create a Floor Plan

Using your kitchen measurements, begin sketching in your cabinet space. Start in the 0', 0' corner (upper left) of the grid and work outward, keeping in mind that each large square equals 1 foot and each small square equals 3 inches. Be sure to note the location of doors, windows, electrical outlets, plumbing fixtures, ventilation, and major appliances. Remember - you may be able to move major appliances several inches to accommodate your layout.

Kitchen Designer Session

Use the Kitchen Planning Checklist on the back of this planner to organize your thoughts, then make an appointment with one of our qualified Kitchen Designers to finalize your layout. They'll review your layout with you and enter it into our computer design system. Our Kitchen Designers are also available to answer any questions you may have.
